Creating a inspection zone based on RAD 1000

- Groups of employees equipped with RAD1000 manual scanning scanners can provide inspection in a certain area of location (in the open space or in a building)
 - For each 100m², a repeater is needed that receives signals from devices in the coverage area and transmits them to a centralized computerized system
 - The cost of such a zone is an additional \$ 100 for each RAD1000 device. The minimum number is 10 devices.
 - The additional cost includes: a dedicated radio channel block for each RAD1000, repeater, central console software.
-
